

Occupational Health Compliance and Monitoring Process

Level 6 Diploma in Paramedic Science (RQF) OH Compliance and Monitoring Process

This process incorporates best practices derived from NHS Employers' Work Health Assessment guidelines to ensure comprehensive health checks and reasonable adjustments where necessary.

The process applies to all applicants and enrolled students, who must demonstrate compliance with health requirements as part of their admission and progression within the programme.

These requirements are crucial for ensuring that students are fit to practice safely and effectively in demanding healthcare environments, including frontline ambulance services and hospitals.

The results of this process informs both suitability for practice and eligibility for reasonable adjustments to programme delivery and assessment.
